Title Prompt - const prompt = `Correct the grammar of the following blog title and return only the corrected title without any additional text, formatting, or symbols: "${text}"`;

Description Prompt - const prompt = description === "" ? `Generate only one short blog description based on this title: "${title}". Your response must be only one sentence, strictly under 30 words, with no options, no greetings, and no extra text. Do not explain. Do not say 'here is'. Just return the description only.` : `Fix the grammar in the following blog description and return only the corrected sentence. Do not add anything else: "${description}"`;

Blog Prompt - const prompt = ` You will act as a grammar correction engine. I will provide you with blog content in rich HTML format (from Jodit Editor). Do not generate or rewrite the content with new ideas. Only correct grammatical, punctuation, and spelling errors while preserving all HTML tags and formatting. Maintain inline styles, image tags, line breaks, and structural tags exactly as they are. Return the full corrected HTML string as output. `;
