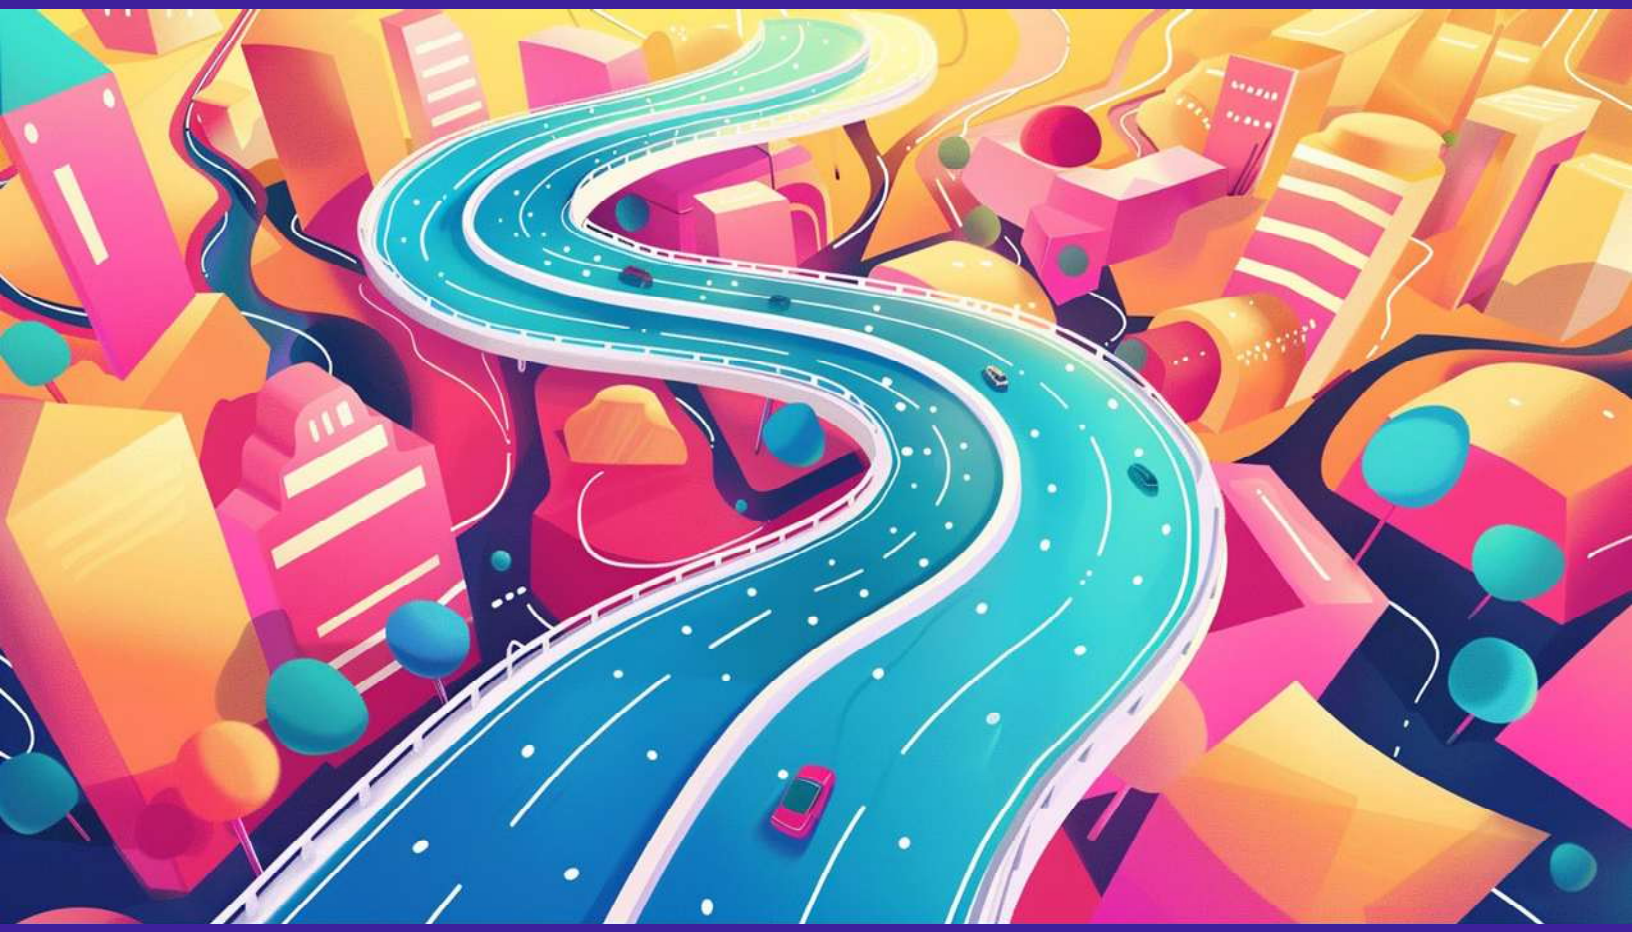
THE COMPLETE FRONT-ENDDEVELOPER ROADMAP



lokanath-mohanty

Journey to Frontend Mastery

Introduction

Frontend development involves building the user interface and experience of websites or web applications using web technologies like HTML, CSS, and JavaScript.

Who is this for?

- **Beginners** who want to land a frontend developer job.
- **Intermediate learners** wanting to fill knowledge gaps.

1-Year Learning Plan Overview

Skill	Time Required	Learning Phase
HTML	2 weeks	Beginner
CSS	1 month	Beginner
JavaScript	2 months	Beginner
Git	2 weeks	Beginner
TypeScript	3 weeks	Intermediate
React	2 months	Intermediate
SASS	2 weeks	Intermediate
Tailwind CSS	3 weeks	Intermediate
Automated Testing	1 month	Advanced
Next.js	1.5 months	Advanced
React Native	2 months (optional)	Advanced

Top Tips for Beginners

- **Start Small and Build Up** – Learn fundamentals before advanced frameworks.
- **Practice Consistently** – Code daily to retain concepts.
- **Work on Projects** – Apply learning in real-world projects.
- **Ask for Help** – Use ChatGPT, Stack Overflow, or Discord communities.
- **Join Communities** – Follow Frontend Mentor, Hashnode, or Reddit.
- **Learn to Debug** – Understand error messages and use dev tools.
- **Use Rubber Duck Debugging** – Explain code out loud to catch bugs.
- **Read Documentation** – Official docs are the best resource.
- **Stay Updated** – Follow dev blogs, Twitter, or YouTube channels.
- **Be Patient & Persistent** – Learning to code takes time.
- **Embrace Change** – Web tech evolves fast—adapt continuously.
- **Take Breaks** – Rest improves clarity and productivity.

HTML – HyperText Markup Language

Duration: 1–2 weeks
Purpose: Structure the content of web pages.
Key Concepts:
Tags: <html>, <head>, <body>, <h1> to <h6>, <p>, <a>, <img>
Forms: <form>, <input>, <label>, <button>
Semantic tags: <section>, <article>, <footer>, <nav>
Multimedia: <audio>, <video>, <source>

Example:

```
<!DOCTYPE html>
<html>
 <head>
  <title>My Portfolio</title>
 </head>
 <body>
  <header>
   <h1>Welcome to My Website</h1>
  </header>
  <section>
   <p>This is a paragraph.</p>
   <a href="https://linkedin.com">My LinkedIn</a>
  </section>
 </body>
</html>
```

CSS – Cascading Style Sheets

Duration: 2–4 weeks
Purpose: Add styles (color, layout, responsiveness)
Key Concepts:
Selectors: .class, #id, element, :hover, ::before
Box Model: margin, padding, border
Flexbox & Grid for layout
Responsive Design: Media queries
Transitions, animations

Example:

```
body {
 font-family: Arial, sans-serif;
 background-color: #f5f5f5;
}

h1 {
 color: #333;
}

@media (max-width: 600px) {
 h1 {
  font-size: 20px;
```

```
 }
}
```

HTML/CSS Project Ideas:

- **Portfolio Website**
- **Responsive Blog Layout**
- **Product Landing Page**

JavaScript

Duration: 6–8 weeks
Purpose: Adds interactivity (clicks, form validation, dynamic content)
Key Concepts:
Variables: let, const, var
Functions, Objects, Arrays, Loops
DOM Manipulation: document.getElementById()
Async JS: fetch, Promises, async/await
Event Handling: click, submit, keyup

Example:

```
document.getElementById("btn").addEventListener("click", function () {
  alert("Button clicked!");
});
```

JavaScript Project Ideas

- **To-Do App**
- **Weather App (API)**
- **Image Slider**
- **Quiz App**

Git + GitHub

Duration: 2 weeks
Purpose: Version control, code collaboration

Key Concepts:
git init, git clone, git status, git add, git commit
Branching: git branch, git checkout
Remote: git push, git pull, git fetch
Platforms: GitHub, GitLab

TypeScript

Duration: 2–3 weeks
Purpose: Typed JavaScript – fewer bugs, better editor support

Example:

```
function greet(name: string): void {
  console.log("Hello, " + name);
}

greet("Loknath");
```

React.js

Duration: 6–8 weeks
Purpose: Build dynamic UIs with components
Key Concepts:
Components, Props, State, JSX
Hooks: useState, useEffect
Event handling, forms
Routing: React Router
Data fetching: axios, fetch

Example:

```
import { useState } from 'react';

function Counter() {
  const [count, setCount] = useState(0);
  return <button onClick={() => setCount(count + 1)}>{count}</button>;
}
```

React Project Ideas

- **Todo List**
- **Weather App**
- **Recipe Finder**
- **Expense Tracker**
- **E-Commerce Frontend**

SASS

Duration: 1–2 weeks
Purpose: CSS with variables, nesting, functions
Example:

```
$primary-color: #3498db;

button {
  background-color: $primary-color;
```

```
 &:hover {
   background-color: darken($primary-color, 10%);
 }
}
```

Tailwind CSS

Duration: 2–3 weeks
Purpose: Utility-first CSS framework
Example:

```
<button class="bg-blue-500 text-white px-4 py-2 rounded hover:bg-blue-700">
  Click Me
</button>
```

Automated Testing (Jest/Vitest)

Duration: 3–4 weeks
Purpose: Ensures your code works correctly

Example (Jest):

```
test("adds 2 + 2", () => {
  expect(2 + 2).toBe(4);
});
```

Next.js

Duration: 4–6 weeks
Purpose: React framework with server-side rendering and SEO
Key Concepts:
Pages and routing
Data fetching: getStaticProps, getServerSideProps
API Routes
Auth: NextAuth.js
Styling: Tailwind, CSS Modules

Next.js Project Ideas

- **Personal Blog**
- **E-commerce Store**
- **Event Booking**
- **Recipe Sharing Platform**

React Native (Optional)

Duration: 6–8 weeks
Purpose: Build mobile apps with React
Concepts:
Core Components: View, Text, Image, ScrollView
Navigation: react-navigation
Native modules: AsyncStorage, Push Notifications

React Native Project Ideas

- **Fitness Tracker**
- **Expense Tracker**
- **News App**
- **Shopping Cart App**

Final Notes

- By following this roadmap and building projects at every stage, you will:
- Master frontend fundamentals
- Create a strong portfolio
- Be ready to apply for junior frontend developer roles

THANK YOU
