The Problem: A Broken Education System

With over 1.5 billion students globally, education remains one of the world's largest & most outdated systems.

Despite massive spending, we face:

Outdated classrooms and rote learning

Fake degrees and unverifiable credentials

Unemployment among degree-holding youth

Misalignment between education and industry needs

The current syste...

Zuddl

Zuddl helps large organisations host conferences online

[See full page](#)

[People, funding & more](#)

Zuddl lets large organisations create conferences online that can go live in minutes. We reproduce all aspects of a physical conference from one on one networking to expo showcases.

Existing online conferences often feel like a one-way webinar where attendees have no impact on the outcome. It might as well be a pre-recorded video. On most platforms, all online events look the same. It's easy for attendees and speakers to forget what they're attending. Many

customisable platforms that do exist take weeks or months to get your event up and running, we do it within minutes.

At Zeddl, we're buil...

Fashion shoots in minutes, 2x cheaper, 10x faster using AI

[See full page](#)[People, funding & more](#)Meet [Rahul](#) and [Sushant](#) that work here

"AI-Powered Fashion Shoots in Minutes – No Photographers, No Models, No Locations Needed."

Fashion brands spend ₹50,000-₹2,50,000 per shoot per range. While the shoot takes 2-3 days, the actual time taken from the creative process to making the catalogue live is around 15-25 days leading to an inventory block of a few days. Traditional shoots need a team of 4-6 people, including models, photographers, stylists & sometimes outdoor locations. This leads to high costs, logistical challenges, and difficulty in aligning everyone's schedules.

We are disrupting this highly complex & costly process ...

QUIPU AI

Unified Data Intelligence platform that connects enterprise data.

[See full page](#)[People, funding & more](#)

Meet [Naren](#) and [Mukesh](#) that work here

QUIPU AI is a low-code Unified Data Intelligence Platform that helps enterprises transform disconnected, complex data into a connected knowledge fabric—enabling smarter discovery, deeper analytics, and context-aware AI.

How it works:

Unified Schema (Discover & Connect Data Model)

Plug in your data sources—QUIPU auto-discovers existing models or infers them from sample data to build a unified schema.

Connecting Data (Knowledge Fabric)

An automated and governed ETL pipeline connects related data points, creating a semantic knowledge graph with rich context and lineage.
