

For a front-end developer with 3 years of experience, interview questions will likely delve into **core concepts and practical application of technologies like HTML, CSS, JavaScript, and frameworks like React or Angular**. Expect questions about performance optimization, browser compatibility, and potentially some basic data structures and algorithms. [\[1, 1, 2, 2, 3, 3, 4, 4, 5\]](#)

Here's a more detailed breakdown of expected questions, categorized for easier preparation:

HTML, CSS, and JavaScript Fundamentals:

- **HTML:**
 - What are semantic HTML elements and why are they important? [\[6, 6, 7, 7\]](#)
 - Explain the difference between id and class attributes. [\[8, 8\]](#)
 - What are meta tags and their purpose? [\[8, 8, 9, 9\]](#)
 - How do you handle browser compatibility issues? [\[7, 7\]](#)
 - What is the difference between div and span? [\[6, 6, 10, 10\]](#)
- **CSS:**
 - Explain the CSS box model. [\[1, 1, 8, 8\]](#)
 - Describe the CSS Flexbox layout model and its properties. [\[7, 7\]](#)
 - What is the CSS Grid system and how is it different from Flexbox? [\[1, 1, 10, 10\]](#)
 - Explain the concept of responsive design and how you would implement it. [\[1, 1, 11, 11\]](#)
 - How do you handle browser-specific styling issues? [\[1, 1, 8, 8\]](#)
 - What are CSS preprocessors and their advantages? [\[1, 1, 7, 7\]](#)
- **JavaScript:**
 - Explain the concept of closures and hoisting in JavaScript. [\[12\]](#)
 - What are arrow functions and their benefits? [\[12, 12\]](#)
 - Explain the difference between == and === operators. [\[1, 1\]](#)
 - What are the different types of event listeners in JavaScript? [\[1, 1\]](#)
 - What is event delegation? [\[7, 7\]](#)
 - Explain the concept of DOM manipulation. [\[1, 7, 7\]](#)
 - What are the different ways to declare variables in JavaScript (var, let, const)? [\[7, 7, 8, 8\]](#)
 - What are the different types of data in JavaScript? [\[8, 8\]](#)
 - How do you handle asynchronous operations in JavaScript? [\[8, 13, 14\]](#)

Frameworks and Libraries:

- **React/Angular/Vue (depending on the role):** [\[2, 2, 10, 15\]](#)
 - What is the purpose of React components? [\[2, 2, 10, 10\]](#)
 - What are the different types of React hooks? [\[2, 2\]](#)
 - How do you handle state in a React application? [\[2, 2\]](#)
 - What are the different lifecycle methods in React? [\[2, 2\]](#)

- What are the advantages of using a framework like React? [2, 7, 10, 16]

- **Other Libraries/Tools:**

- What are the benefits of using libraries like jQuery? [7, 7, 9, 9]
- What are some popular CSS frameworks (e.g., Bootstrap, Materialize)? [7, 7]
- What are task runners like Gulp or Webpack and their purpose? [1, 1]

Performance Optimization:

- How do you optimize website performance?
- What are some techniques to improve page load time?
- What is a CDN and why is it used?
- What is lazy loading and when would you use it?
- What is reflow and how can you minimize it? [1, 3, 8, 10]

Other Important Areas:

- **Accessibility:**
 - Explain the concept of semantic HTML and its importance for accessibility. [6, 7, 17]
 - What is ARIA and when would you use it? [1, 1]
- **Security:**
 - What are common security concerns in front-end development? [18, 18]
 - Explain Cross-Site Scripting (XSS) and ClickJacking. [10, 18, 19]
- **Testing:**
 - How do you test your front-end code? [1, 1]
 - What are different types of testing (unit testing, integration testing, etc.)? [1, 1]
- **Data Structures and Algorithms (Basic):**
 - What are common data structures and algorithms? [4, 4]
 - Be prepared to write simple JavaScript code snippets for common algorithms (e.g., sorting, searching). [4, 20, 21]

Behavioral Questions:

- Tell me about a time you had to debug a complex issue in a front-end application. [3, 22, 23]

Generative AI is experimental.
