Insider Tip

Search for “**UI/UX Designer**” or “**Product Designer**” on LinkedIn. Filter by:

- Experience: Entry-level.
- Location: India
- Sort by: Recent
- Save 5-10 job posts to track skills & requirements.

Part 1:

Is UI/UX Design for You?

- “I’m not creative enough – can I be a designer?”
- “I can use Canva – does that count as design?”
- “I’m not from a design school – will companies hire me?”

✔ **Yes, you can. What you need is:**

- 📌 Curiosity to understand users and solve problems
- 📁 Proof of design thinking (portfolio > certificates)
- 🔄 Consistent effort over 90 days

5 Myths That Hold You Back

✖ Myth	✔ Reality
“Design = visuals only.”	It’s about usability, not just beauty.
“You need a design degree.”	No – portfolio > degree.
“UI/UX is only for creative people.”	It’s also logic, research, and empathy.
“You must master all tools first.”	Start with one: Figma.
“Designers don’t need to understand business.”	Great designers connect design to outcomes.

Core Skills You Need (Tiered Format)

Tier 1 – Foundations Skills

Design Thinking Basics

UX Research: User personas, journey mapping

UI Basics: Color theory, typography, spacing

Tools: Figma or Adobe XD

Take Google UX Design (Coursera – Free Trial) or Figma's free crash course

Tier 2 – Core Tools

Wireframing & Prototyping in Figma

Usability Testing & Feedback Loops

Design Systems: Components, consistency, reusability

Collaboration: Handoff using Figma or Zeplin

Redesign a popular app (e.g., Swiggy, Spotify) → Post before/after shots on LinkedIn

Tier 3 – Differentiators (Helps You Stand Out)

UX Writing & Microcopy Basics

Interaction Design (animations, transitions)

Accessibility (WCAG standards)

Portfolio Storytelling (case studies + impact)

Write a UX case study on Notion → “How I improved [app name] experience for users”

Part 2:

Your 90-Day Career Roadmap

Month 1: Understand the basics of design thinking & tools

Week 1

Learn what UI/UX means; read 2 case studies (UX Collective)

Week 2

Complete Figma's beginner tutorial; build your first wireframe

Week 3

Learn color, typography, and layout basics

Week 4

Redesign one simple mobile screen (e.g., login page)

Month 2 – Practice problem-solving & design process

Week 1

Pick 1 real-world problem → build user persona + journey map

Week 2

Create low-fidelity wireframes → convert to high-fidelity in Figma

Week 3

Conduct usability testing (friends/users); document insights

Week 4

Write your first mini case study & publish it on Notion/Behance

Month 3 - Showcase work & apply confidently

Week 1

Design 2–3 app/web UI screens for your portfolio

Week 2

Upload projects on Behance & Notion with case studies

Week 3

Mock interviews & portfolio feedback (Discord/LinkedIn)

Week 4

Apply to 5–10 UI/UX internships via [myjobb AI](#); share your portfolio post on LinkedIn

3 Projects That Can Get You Hired

App Redesign: Improve UX of an existing app

Landing Page Design for a Startup

Dashboard UI + User Flow Documentation

Part 3: Crack the Interview

Real Questions with Answer Frameworks

1. What is UX Design?

→ Enhancing user satisfaction by improving usability & accessibility.

2. What's the difference between UI and UX?

→ UI = visuals; UX = user experience + flow.

3. What is Design Thinking?

→ Empathize → Define → Ideate → Prototype → Test.

4. How do you start a design project?

→ Understand users → define goals → ideate solutions.

5. What tools do you use?

→ Figma, Notion, Miro, Zeplin, FigJam.

6. What is a user persona?

→ Fictional representation of target users.

7. What is usability testing?

→ Observing users interact to identify issues.

8. How do you handle feedback?

→ Stay objective; iterate with reasoning.

9. How do you decide between two design options?

→ Use data, feedback, and test outcomes.

10. What is a wireframe vs prototype?

→ Wireframe = layout; Prototype = interactive version.

11. How do you ensure accessibility?

→ Color contrast, readable fonts, alt text.

12. What's the role of empathy in UX?

→ Understanding user pain points deeply.

13. Tell me about your favorite project.

→ STAR method + focus on user impact.

14. How do you prioritize design features?

→ Based on user goals + business value.

15. What's the most common UX mistake?

→ Designing for aesthetics over usability.

Final Tips for Freshers

Build 3 strong projects – quality > quantity.

Keep your portfolio simple, structured, and story-driven.

Learn in public: share your redesigns, insights, and Figma tips.
