

JavaScript Coding Questions (No Inbuilt Functions)

1■■■ Reverse a String

```
function reverseString(str) {  
  let reversed = "";  
  for (let i = str.length - 1; i >= 0; i--) {  
    reversed += str[i];  
  }  
  return reversed;  
}
```

2■■■ Check if a String is Palindrome

```
function isPalindrome(str) {  
  let reversed = "";  
  for (let i = str.length - 1; i >= 0; i--) {  
    reversed += str[i];  
  }  
  return str === reversed;  
}
```

3■■■ Find Maximum Number in an Array

```
function findMax(arr) {  
  let max = arr[0];  
  for (let i = 1; i < arr.length; i++) {  
    if (arr[i] > max) {  
      max = arr[i];  
    }  
  }  
  return max;  
}
```

4■■■ Find Minimum Number in an Array

```
function findMin(arr) {  
  let min = arr[0];  
  for (let i = 1; i < arr.length; i++) {  
    if (arr[i] < min) {  
      min = arr[i];  
    }  
  }  
  return min;  
}
```

5■■■ Count Occurrences of a Character

```
function countChar(str, char) {  
  let count = 0;  
  for (let i = 0; i < str.length; i++) {  
    if (str[i] === char) count++;  
  }  
  return count;  
}
```

6■■■ Find Factorial of a Number

```
function factorial(n) {  
  let fact = 1;  
  for (let i = 1; i <= n; i++) {  
    fact *= i;  
  }  
  return fact;  
}
```

7■■■ Find the Second Largest Number

```
function secondLargest(arr) {  
  let first = -Infinity, second = -Infinity;  
  for (let i = 0; i < arr.length; i++) {  
    if (arr[i] > first) {  
      second = first;  
      first = arr[i];  
    } else if (arr[i] > second && arr[i] < first) {  
      second = arr[i];  
    }  
  }  
  return second;  
}
```
