

01

NESTJS

The Framework Your Node.js Projects
Need

Part 1

WHY NESTJS?

02

- Brings structure to Node.js applications
- Perfect for scaling teams
- Consistent codebase
- Built-in enterprise features
- No more boilerplate hassles

KEY FEATURES OUT OF THE BOX

03

- Built-in Routing
- Exception Handling
- Testing Framework
- API Documentation
- Middleware Support
- Plugin System

POWERFUL INTEGRATIONS

04

- Express.js (Default) or Fastify
- Class Validator
- Jest for Testing
- TypeORM for SQL
- Mongoose for NoSQL
- Swagger & Compodoc

PERFECT FOR BUILDING

05

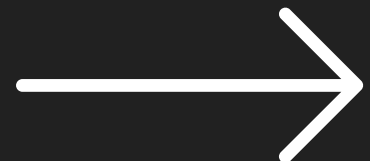

- REST APIs
- Microservices
- WebSocket Applications
- GraphQL Services
- MVC Applications
- CLI Tools

CORE ARCHITECTURE

06

- Modules
- Controllers (API endpoints)
- Services (Business logic)
- Entities/Schemas
- DTOs
- Pipes & Validation

ENTERPRISE-READY FEATURES

07

- Built-in Authentication
- Database Transactions
- File Uploads
- Email Integration
- Exception Handling
- Environment Management

DEVELOPER EXPERIENCE

08

- Robust CLI Tools
- Auto-documentation
- TypeScript Support
- Dependency Injection
- Easy Testing Setup
- Active Community
