

React Native Interview Questions (1-Year Experience)

1. JavaScript Questions

- Difference between var, let, const
- Arrow functions
- Closure
- Hoisting
- Promises and async/await
- == vs ===
- Event loop
- Spread and destructuring
- Map, filter, reduce
- Callback functions

2. React Basics

- Functional components
- Props vs state
- JSX
- useState, useEffect
- Lifecycle
- Conditional rendering

3. React Native Core

- React vs React Native
- StyleSheet
- Flexbox
- ScrollView vs FlatList
- SectionList
- SafeAreaView
- Responsive design

4. Navigation

- Stack, Tab, Drawer
- Passing params
- navigate vs push
- useNavigation, useRoute
- Deep linking
- useFocusEffect

5. API Integration

- Axios vs Fetch
- Error handling
- Loading states
- Token handling
- JWT basics
- Debouncing, throttling

6. State Management

- Redux, Redux Toolkit
- Reducers, actions, dispatch
- Selectors
- Context API vs Redux
- Store architecture

7. Authentication & Storage

- AsyncStorage
- Auto login
- Logout
- Secure token storage
- Protected routes

8. UI Libraries & Forms

- RN Paper, Native Base

- Formik, Yup

- Lottie

9. Device Features

- Camera

- Image picker

- Permissions

- Linking

- Location

- Notifications

10. Performance Optimization

- React.memo

- useCallback, useMemo

- FlatList optimization

- Re-render issues

- PureComponent

11. Debugging & Build

- Metro Bundler

- Flipper

- Debugging APIs

- Android build process

- APK/AAB generation

12. HR Questions

- Project explanation

- Role in team

- Challenges

- Performance optimization

- Strengths & weaknesses
