

1. To Connect your ubuntu on local terminal

```
ssh -i 'your .pem file' ubuntu@your_public_ip_address
```

2. To Update your ubuntu

```
//First run this => sudo apt update
```

```
//And then run this  
sudo apt upgrade
```

3. Install Node.js in your ubuntu machine

```
//First run this
```

```
curl -fsSL https://deb.nodesource.com/setup_20.x | sudo -E bash -
```

```
//And then run this  
sudo apt-get install -y nodejs
```

4. To Create .env file

```
vim .env
```

```
// After this
```

Copy everything from your .env file, paste it into the Ubuntu terminal, then press **Ctrl + C**.

After that, type **:wq** to save the file.

5. To Edit any file

6.

```
vim filename
```

Basic Vim Commands:

- Press **i** → Enter insert mode (to edit text)
- Press **ESC** → Exit insert mode
- Type **:wq** → Save and exit
- Type **:q!** → Exit without saving

7.

6. Setup to run ec2 instance after closing terminal

```
sudo npm install -g pm2
```

```
// and after this run
```

```
pm2 start "your file path" --name "my-node-app"
```

7. For Frontend

```
sudo npm install -g serve
```

```
// And after this run
```

```
pm2 start "serve -s dist -l 3000" --name "vite-app"
```
