

**20 MUST-
KNOW**

**JAVASCRIPT
ONE-LINERS**

REVERSE AN ARRAY

.reverse()

```
const reversed = [1, 2, 3].reverse();
```

ADD VALUE IN CONTENT

```
const reversed = [1, 2, 3].reverse();
```

Quickly reverses the array order.

REMOVE DUPLICATES FROM AN ARRAY

```
const unique = [...new Set([1, 1, 2, 2, 3])];
```

Set ensures only unique values.

SWAP TWO VARIABLES

```
[a, b] = [b, a];
```

Neat destructuring trick to swap values.

FLATTEN ARRAYS

```
const flat = arr.flat(Infinity);
```

Flattens deeply nested arrays.

SHORT-CIRCUIT DEFAULT

```
const name = input || "Guest";
```

Fallback when value is falsy.

QUICK BOOLEAN CONVERSION

```
const isTrue = !!value;
```

Double  forces a Boolean.

LAST ELEMENT OF AN ARRAY

```
const last = arr.at(-1);
```

`.at(-1)` gives the last item.

PICK RANDOM ARRAY ELEMENT

```
const random = arr[Math.floor(Math.random() * arr.length)];
```

Classic trick to get a random item.

CAPITALIZE FIRST LETTER

```
const cap = str[0].toUpperCase() + str.slice(1);
```

Uppercase first character only.

COUNT WORDS IN A SENTENCE

```
const count = str.trim().split(/\s+/).length;
```

Works for any whitespace.

Madhav Kabra

IS IT A PALINDROME?

```
const isPalindrome = str === str.split('').reverse().join('');
```

`.at(-1)` gives the last item.

SUM ARRAY VALUES

```
const sum = arr.reduce((a, b) => a + b, 0);
```

Simple reducer pattern.

CHECK IF EVEN

```
const isEven = num => num % 2 === 0;
```

Returns true for even numbers.

CLONE AN OBJECT

```
const copy = { ...original };
```

Simple reducer pattern.

Madhav Kabra

MERGE ARRAYS

```
const merged = [...a, ...b];
```

Simple spread to merge arrays.

WAIT FOR SECONDS

```
await new Promise(r => setTimeout(r, 1000));
```

Delay with `async/await`.

FORMAT CURRENT DATE

```
const today = new Date().toISOString().split('T')[0];
```

Returns date as YYYY-MM-DD.

ARRAY TO OBJECT

```
const obj = Object.fromEntries([['a', 1], ['b', 2]]);
```

Converts key-value pairs to object.

REMOVE FALSY VALUES

```
const clean = arr.filter(Boolean);
```

Removes false, 0, null, undefined, "".
