

TOP ANGULAR CHART LIBRARIES

TO KNOW IN 2025!

Chart.js with Angular (ng2-charts)

- ✦+ Lightweight and beginner-friendly
- ✦+ Works well for small to mid-level apps
- ✦+ Supports line, bar, pie, radar, and more
- ✦+ Responsive design for both web and mobile

ngx-charts

- ✦+ Built specifically for Angular
- ✦+ Uses D3.js for smooth animations & vector graphics
- ✦+ Includes various chart types: area, bar, pie, heatmap
- ✦+ Great for dynamic & interactive visuals in apps

Highcharts Angular

- ✦ Ideal for professional and enterprise-level app
- ✦ Offers advanced charts: stock, 3D, maps
- ✦ Easy to integrate and customize
- ✦ Paid license, but rich in features and polish

ApexCharts Angular

- ✦ Clean UI and flexible chart options
- ✦ Real-time data updates without full page reloads
- ✦ Highly customizable with themes and animations
- ✦ Perfect for dashboards and performance tracking

ECharts with Angular

- ★⁺ Handles large datasets smoothly
- ★⁺ Interactive features like zoom, pan, and drill-down
- ★⁺ Supports complex charts like scatter, tree, geo maps
- ★⁺ Reliable choice for analytical and data-rich apps

D3.js with Angular

- ★⁺ Gives full control over visuals
- ★⁺ Ideal for custom, unique, and complex charts
- ★⁺ Requires more coding and setup
- ★⁺ Best for experienced developers needing complete flexibility

FusionCharts Angular

- ★⁺ Business-ready with 100+ chart types & 2,000+ maps
- ★⁺ Easy drag-and-drop dashboards
- ★⁺ Comes with solid documentation and support
- ★⁺ Suitable for teams building detailed, client-facing reports
