SWADHIN DHARA

REACT COMPILER

WHAT'S NEW?

- Automatic optimization without `useMemo`, `useCallback`, and `React.memo`

BENIFITES

- Simplifies code.
- Reduces developer workload.

```
// Before React 19
```

```
const memoizedValue = useMemo(() => computeExpensiveValue(a, b), [a, b]);
```

```
// After React 19
```

```
const value = computeExpensiveValue(a, b); // Automatically optimized
```

SWADHIN DHARA

SERVER COMPONENTS

WHAT'S NEW?

- Native integration of server components.
- SEO friendly and improved performance.

BENIFITES

- Executes requests on the server.
- Faster page loading

```
App.jsx

// Server Component Example

"use server";
export default function serverComponent() {
  const data = fetchDataFromAPI();
  return <div>{data}</div>;
}
```

swadhindhara@gmail.com

SWADHIN DHARA

ACTIONS & NEW HOOKS

WHAT'S NEW?

- Simplifies asynchronous state management.

BENEFITS

- `useActionState`: Simplifies form handling.
- `useOptimistic`: Declarative optimistic updates.
- `useFormStatus`: Track form submission state like pending, success, or error.

```
App.jsx

// Optimistic UI Example

const [mutate] = useOptimistic(updateData, optimisticUpdate);

mutate(newData);
```

swadhindhara@gmail.com

SWADHIN DHARA

USE() HOOK

BENIFITES

- Simplifies asynchronous data fetching.
- Eliminates the useEffects and useState.

```
App.jsx

// Using the use() hook

const data = use(fetchData());

return <div>{data}</div>
```

swadhindhara@gmail.com

SWADHIN DHARA

LAZY LOADING

WHAT'S NEW?

- Native lazy loading for images and assets.

BENEFITS

- Improves load times.
- Enhances user experience.

```
App.jsx

// Lazy loading an image

<img loading='lazy' src='image.webp' alt='lazy loaded example' />
```

swadhindhara@gmail.com

SWADHIN DHARA

ERROR HANDLING IMPROVEMENTS

WHAT'S NEW?

- Improved tools for error handling,
- especially in server components.

```
App.jsx

// Enhanced Error Handling Example

"use server";

export default function serverComponent() {
  try{
    const data = fetchDataFromAPI();
    return <div>{data}</div>;
  }catch(error){
    return <ErrorComponent message={error.message} />
  }
}
```

swadhindhara@gmail.com

SWADHIN DHARA

CONCLUSION

REACT 19 BRINGS:

- Simplified async task management.
- Improvement of SEO & performance.
- Compact server components.
- Native lazy loading and enhanced
- error handling.
