Start building your app now

An open source component library optimized for fast development, easy maintenance, and accessibility. Just import and go—no configuration required.

```
import "@radix-ui/themes/styles.css";
import { Theme, Button } from "@radix-ui/themes";

export default () => (
  <Theme>
    <Button>Hey 🍌</Button>
  </Theme>
);
```

MANTINE UI

123 responsive components
built with Mantine

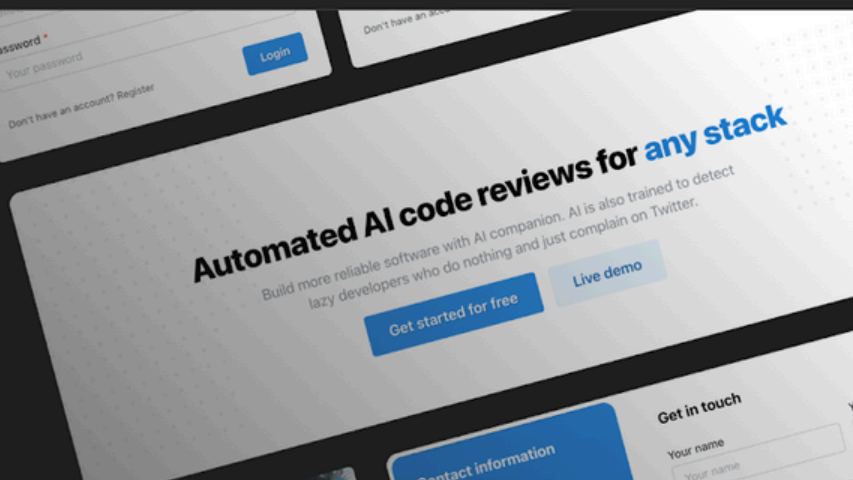

Build your next website even faster with premade responsive components designed and built by Mantine maintainers and community. All components are free forever for everyone.

[Browse components](#) [GitHub](#) [Get started with Mantine](#)

**Flexible**
All components are built with Mantine theme, change colors, fonts, shadows and other properties.

**Light and dark theme**
Most components support both dark and light color schemes by default, no additional modifications needed.

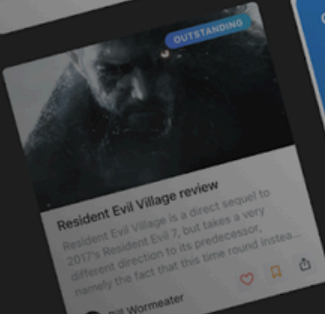

**Free for everyone**
Free, open source, community-driven, MIT license. Use anywhere, including commercial projects.

Automated AI code reviews for **any stack**

Build more reliable software with AI companion. AI is also trained to detect lazy developers who do nothing and just complain on Twitter.
